<b>What's going well and why:</b>		
<p>In week 8, project team still worked hard and did the project smoothly. We have already caught the planning schedule as we estimated last week.</p> <p>We were behind the planning schedule one week because the plenty changes of methodology and documents as we had explained in Weekly Progress Report - Week 5. However, through the continuous efforts of the project team, we used 3 weeks to catch up the behind schedule. We already finished the Iteration Three of Exploration Phase and totally caught the planning schedule.</p>		
<b>What's not going well and why:</b>		
<p>Although the project team has drafted the documents of DSDM for Feasibility Phase and Foundations Phase which are recommended in the Project in the box, we have not made the final confirmation of the documents.</p>		
<b>Suggestions/Issues:</b>		
<p>For the documents which have been created, project team should review the technical documents with project advisor during the weekly advisor meeting and make the confirmation of these during the weekly team meeting when these are approved by project advisor.</p>		
<b>Project changes</b>
